

Forward Propagation 예시 MNIST Classification Model

수업 목표

이번 수업의 핵심:

- MNIST Dataset 구성
- Neural Network 기반 MNIST Classification 모델
- Forward Propagation 코드 작성
- Error/Loss의 개념 확인

핵심 개념

- MNIST Dataset
- Classification Model
- Squared Error / Loss

MNIST Dataset

MNIST (Modified National Institute of Standards and Technology)

- 0에서 9까지 손글씨 숫자 사진
 - 55,000개의 Training Examples
 - 10,000개의 Test Examples
 - 각 숫자 사진들은 전처리됨
 - 숫자가 사진의 중앙에 정렬
 - 숫자가 비슷한 크기로 조절
 - 각 사진이 28×28 픽셀 크기로 고정
- 0부터 1사이의 실수 행렬
